

CAPABILITY STATEMENT

Company Overview

AUSI LLC is a Florida-based small business providing Arabic-language intelligence support, open-source intelligence (OSINT) research, and document analysis to federal, defense, legal, and compliance clients. The firm is led by a founder with 14 years of experience performing cleared analytical and linguistic support for a federal contractor serving Department of Defense and Intelligence Community requirements.

AUSI LLC goes beyond translation — identifying patterns, inconsistencies, and risk indicators embedded in Arabic-language materials, and delivering findings through clear, decision-ready analytical reporting.

Core Competencies

- Open-Source Intelligence (OSINT) Collection, Research & Analysis
- Threat, Risk & Behavioral Pattern Assessment
- Arabic-Language Document Exploitation (DOCEX-style review)
- Investigative & Analytical Reporting
- Arabic-to-English / English-to-Arabic Translation & Interpretation
- Legal & Compliance Document Review
- Cross-Border Due Diligence & Risk Assessment
- Contextual & Cultural Interpretation of Foreign-Language Materials

Key Personnel

AUSI LLC's founder brings 14 years of experience supporting federal contractor programs for U.S. Department of Defense and Intelligence Community clients, with a background including:

- Open-Source Intelligence (OSINT) collection, research, and reporting
- Counterterrorism and counterintelligence analytical support
- Structured Analytic Techniques and critical-thinking methodologies for intelligence analysis
- Social media intelligence (SOCMINT) and digital footprint research
- Proficiency with Analyst's Notebook and standard IC/DoD analytical tools
- Native Arabic linguist — Modern Standard Arabic plus Gulf, Levantine, and Egyptian dialects — with professional experience in translation, transcription, interpretation, and cultural/contextual analysis
- Former Top Secret/Sensitive Compartmented Information (TS/SCI) clearance and former Counterintelligence (CI) Polygraph — currently inactive; eligible for reinvestigation under a sponsoring federal requirement
- Former Department of Homeland Security (DHS) Public Trust designation

Differentiators

- Founder-level personnel with 14 years of federal contractor experience supporting DoD and Intelligence Community analytical requirements
- Combines OSINT + native-level linguistic expertise + structured intelligence analysis methodology
- Focus on risk identification, inconsistency detection, and underlying intent — not translation alone
- Prior cleared-environment experience (former TS/SCI, CI Polygraph) and familiarity with IC/DoD reporting standards
- Deep fluency across Arabic dialects and regional cultural context
- Built for high-stakes legal, compliance, investigative, and defense/intelligence-adjacent environments

Intelligence & Analytical Capabilities

- Collection, verification, and synthesis of open-source information
- Identification of patterns, anomalies, and risk indicators in foreign-language materials
- Contextual and cultural analysis of Arabic-language communications and documents
- Analytical reporting to support investigative, compliance, and decision-making needs
- Support for legal, corporate, and due diligence workflows

Past Performance

AUSI LLC is a recently established firm; corporate past performance is in development. The firm's capabilities are grounded in its founder's 14-year record of performing OSINT research, Arabic-language analysis, and investigative support work for a federal contractor serving DoD and Intelligence Community program requirements — including analysis of complex foreign-language materials, identification of patterns and inconsistencies, and production of analytical products used to support decision-making in high-stakes environments.

Target Clients

- Defense & Intelligence Community Prime Contractors (subcontracting / teaming)
- Cleared Staffing & Language-Services Firms
- Federal Agencies
- Law Enforcement / Investigative Organizations
- Legal & Compliance Organizations
- Government Contractors requiring Arabic-language analytical support
